

*The CIHR Training Program in Regenerative Medicine Visiting Lecture Series presents...*

## **Generating functional tissues from human pluripotent stem cells**

**Dr. Gordon Keller, PhD**  
**Director, McEwen Centre for Regenerative Medicine**  
**Senior Scientist, Division of Stem Cell and**  
**Developmental Biology, UHN**  
**Professor, MBP, University of Toronto**

Learning Objectives:

1. To provide an overview of different types of pluripotent stem cells;
2. To outline strategies from directing differentiation to a specific lineage;
3. To highlight strategies for translating findings from basic research to therapeutic applications.

Date: Wednesday September 29<sup>th</sup>, 2010

Time: 8:00am – 9:00am

Location: 585 University Avenue, 11<sup>th</sup> floor,  
Rm. 11C–1135
